

| Service platform |

Center for Exploration and Experimental Functional Research - CERFE

FIELD OF ACTIVITY

- Small animal functional exploration and breeding (rodents and lagomorphs):
 - Production and distribution of mouse genetic models.
 - Functional exploration and phenotyping.
- Creation of experimental models.

Host structure Genopole®

Supervisory body GIP Genopole®

Funding bodies CRIF - CG91 - MESR

Web site www.genopole.fr

EQUIPMENT/FACILITIES

- // Housing units: ventilated racks, isolators.
- // Handling units: flow hoods.
- // Automated washing, autoclaving and sterilization equipment.
- // Shared-access lab equipments (refrigerators, freezers, microbiological safety cabinets, incubators, NIKON TE2000 inverted microscope, portable anesthesia workstation, suction table for perfusion, weighing scales...).
- // Equipments in shared access technical platforms: Treadmill calorimetric measurement system, actimetry platform, IVIS Xenogen fluorescence / bioluminescence imaging systems, MS9-5 cells counting system.

ACCESS PROCEDURE

The CERFE may be accessed following project approval by an evaluation committee.

To request use of the installations and services and for all quotes and contractual matters.

Please contact:
